From the brand new perspective of Hun Yuan medicine, you can clearly grasp the root causes of our own diseases. **You can break the curse of irreversible and incurable disease from the perspective of conventional medicine,** and lay a good foundation for a radical cure of disease (this is beyond the reach of currently developed technology, instruments and doctors in conventional medicine).

4. Through the study and practice of new medicine, you will strengthen the confidence, strengthen the training of willpower and consciousness penetration, master 1-2 basic healing techniques and **become your own healer.**

HEALERS

1. There is no one else outside of us. **If you want to be a good healer, you should first heal yourself,** and be able to analyze and solve your various physical and mental problems with the technology you have learned, so that you can really help others get out of the problems.

2. Through the study and practice of the basic theory of new medicine, you will establish a new medical view, and **lay the foundation for becoming a specialized and professional Qi healer.**

3. Through learning, you can clearly **understand the cutting-edge, advanced and efficient characteristics and advantages of the new medicine.**

4. You can initially help patients find the root causes of the disease. You will also be able to initially **master 1-2 healing techniques, and use these with others to help them recover from disease.**
